About MAP

MAP Data Systems (www.mapdatasystems.com) is a global provider of enterprise-level, multi-lingual, commercial software for the manufacturing marketplace. MAP provides integrated software solutions in the Quality space:

- Quality Assurance
- Quality Control (product testing)
- Quality Monitoring
- Quality Certification (CoA)
- Specifications Management
- Auditing
- Analysis and Reporting
- Customer Complaints
- Document Management
- SPC

MAP's clients are large manufacturers with multiple plants around the world who need a quality system with functionality of the highest professional standards incorporating global best practices, demand the highest level of reliability, and require that their quality system is integrated with other CCE (complex, critical, enterprise) systems such as the local ERP (including SAP S/4HANA), MES, and HMI/SCADA systems.

The average tenure of MAP employees is in excess of 10 years.

Job Description

This senior web developer will participate in the design and execute the development of software solutions based on our PatrolSuite product platform. This developer must have experience and expertise building and supporting the complete software ecosystem that includes frontend, backend, and mobile disciplines. This position requires a balance of creative input, critical analysis, reliable software engineering, thorough testing, and the consistent delivery of complete, error-free, and well-architected results.

As senior staff, this position will also require engaging MAP clients. Accordingly, outstanding communication skills, oral and written, are required. While travel to client facilities is required from time to time, this is a mostly work-from-home position, and requires the employee to provide a suitable, professional home office free from noise and distractions. Although flex-time is available, employee is expected to maintain normal office hours M-F from 8:00am – 5:00pm Eastern time. This position will occasionally require availability in the off-hours to support overseas clients.

This position reports in dual-fashion to both the PatrolSuite Product Manager and MAP's Technical Product Manager. Daily collaboration with colleagues, and regular interaction with MAP's executive leadership is also expected.

Benefits:

- 401K with company matching.
- Annual bonus. Recent bonuses have exceeded 10% of employee's salary.
- Group health for which MAP pays 100% of the costs for the employee's medical, dental, and vision insurance.
- Paid vacation. Bonus vacation time over the December holidays.
- Flexible work schedule.
- Maternity and paternity leave.

Application:

- Please send resume to employment@mapdatasystems.com.

No recruiters please.
